1. Project Overview

1.1 Project Name

SRP8-045 -- Front Brakes

1.2 Lead

...

1.3 Scope

SRP – 038 is responsible for the development of the Brakes subsystem acting within Vehicle Dynamics. This will consist of (not including) the pedal through the hydraulic lines, master cylinder and brake booster, through to the callipers and brake discs. Also, Brakes will be responsible for the design of the park brake. The aim of the brakes department is to research viable braking systems and options in order to determine packaging requirements, fundamental for other vehicle systems and importantly the design of suspension uprights.

1.4 Out of Scope

... Explicitly state what this project does ***not*** cover (if required for clarification).

1.5 Assemblies

- ASSY - CHASSIS BRAKE LINE
- ASSY - FRONT BRAKE DISC
- ASSY - FRONT BRAKE LINE
- ASSY - FRONT CALIPER - LH
- ASSY - FRONT CALIPER - RH
- ASSY - FRONT MASTER CYLINDER
- ASSY - FRONT MASTER CYLINDER RESERVOIR

2. Interfacing Requirements (PMS)

2.1 CHASSIS BRAKE LINE

2.1.1 Dependencies (what this project relies on)

Assembly	Requirement	Type

2.1.2 Impacts (what relies on this project)

Assembly	Requirement	Type

2.2 FRONT BRAKE DISC

2.2.1 Dependencies (what this project relies on)

Assembly	Requirement	Type

2.2.2 Impacts (what relies on this project)

Assembly	Requirement	Type

2.3 FRONT BRAKE LINE

2.3.1 Dependencies (what this project relies on)

Assembly	Requirement	Type

2.3.2 Impacts (what relies on this project)

Assembly	Requirement	Type

2.4 FRONT MASTER CYLINDER

2.4.1 Dependencies (what this project relies on)

Assembly	Requirement	Type

2.4.2 Impacts (what relies on this project)

Assembly	Requirement	Type

3. ADR Requirements

Pulled directly from the ADR database.
